Trigger Spray with anti-burst hose/dual check valve

- The product is Watermark certified and WELS registered.
- The product is suitable for low hazard back flow prevention application.
- For use it as a bidet spray, an RPZD that complies with AS/NZS 2845.1 or AS 2845.2 needs to be installed for the application to comply with AS/NZS 3500.1 Water Services Clause 12.2.3.
- It is recommended an individual stop cock should be installed and turned off when it is not in use.
- This unit does not allow for permanent spray shut off.
- Maximum working pressure: 500KPA. A pressure limiting valve is required for water pressure above that.
- Suitable for use with cold or warm water.

trigger spray	R460B	WELS - 3 STAR, 8l/m
