# INSTALLATION

## INSTRUCTIONS

### **MIRROR** INSTALLATION GUIDE

Illustrations may not reflect every exact model

## STEP 1:

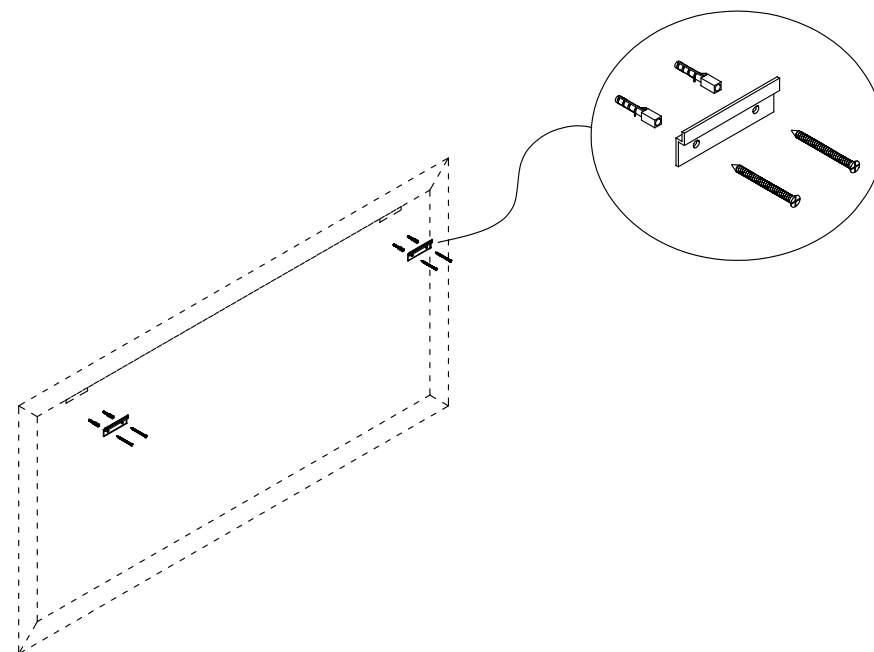

1.1

Measure the distance between the two wall brackets on the mirror, and mark the position on wall.

1.2

Put the 2 wall brackets in accessories box on wall, and drill holes on wall, as Figure B.

## STEP 2:

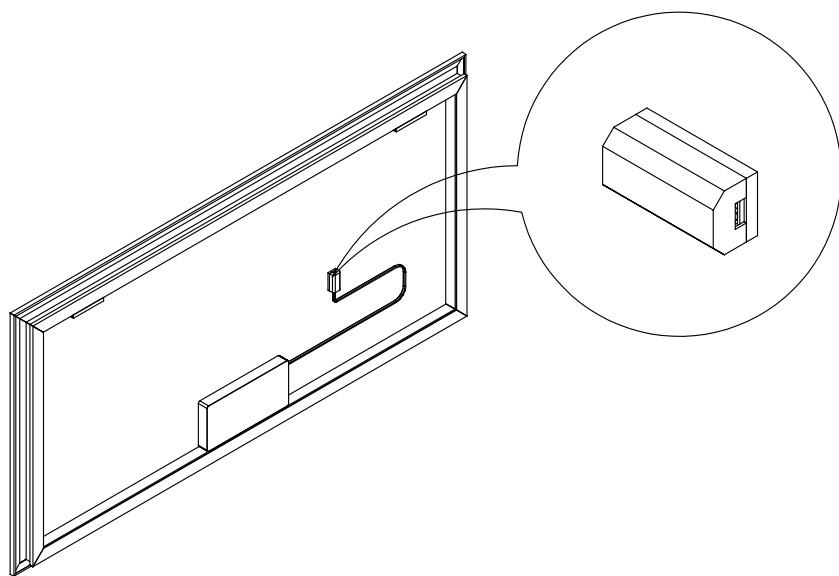

2.1

Use the wall plugs and screws to fix the wall brackets on wall.

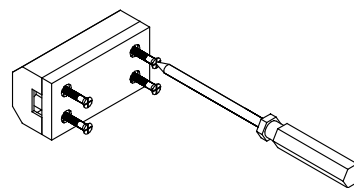

Please note the direction of wall brackets, same as the drawing.

## STEP 3:

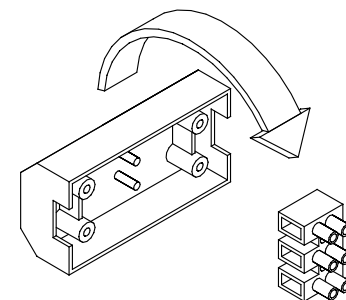

3.1

Take out the junction box and connect the fixed power supply (refer to below for the specific wiring process)

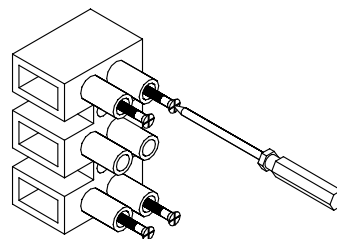

1

Unscrew the rear cover of the junction box.

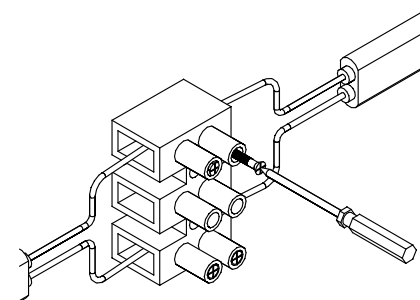

2

Take out the conduit.

3

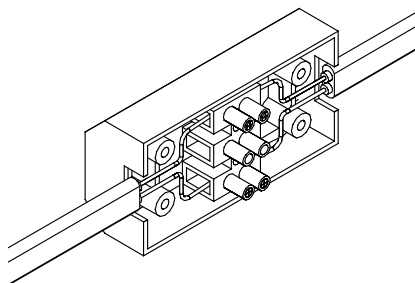

Unscrew the screws.

4

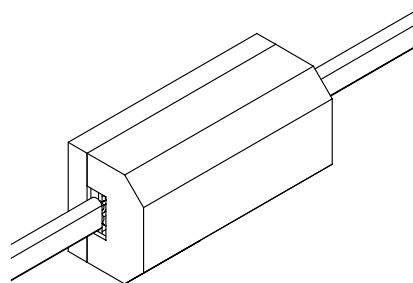

Find positive and negative wiring and connect the fixed power supply, then fix the screws.

## STEP 4:

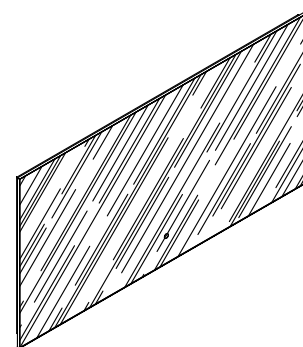

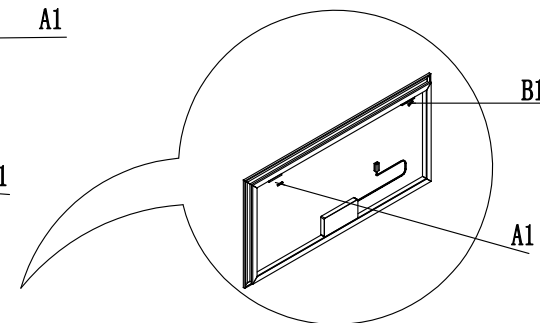

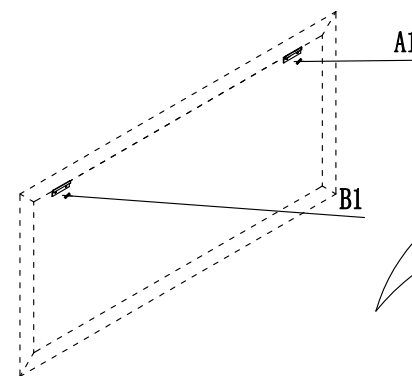

5

Put the conduit back into the box.

6

Fix the rear cover by screws, peel off the film and stick it on proper position on mirror.

4.1

Hang the mirror on the wall brackets.

4.2

Finished.
